

Haiku® Light Designer Series

Bright in Every Sense of the Word

From its slim, sleek design and powerful, long-lasting LEDs to its range of user-focused features, Designer Series light fixtures represent effectiveness, convenience and efficiency at the highest level. Each Premier fixture is available in Haiku's full array of luxury finishes. In addition, Premier fixtures feature color temperature shifting capability to meet your lighting needs in any situation. Select model fixtures are available in black or white and feature a standard color temperature of 2700 K.

Each fixture is outfitted with an occupancy sensor to improve efficiency by keeping the light on only when you need it. Designer Series can also sense ambient light levels and adjusts its brightness to maintain consistent light levels and save energy.

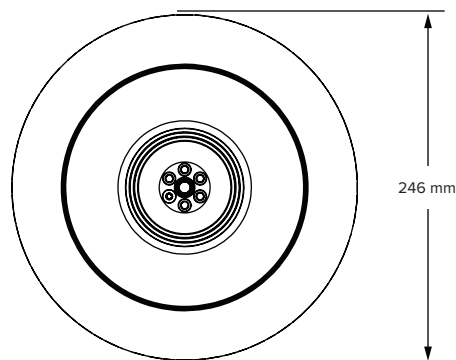

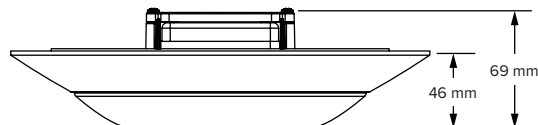

Features and benefits

- LEDs rated to last 50,000 hours
- Designer Series fixtures fit in recessed or flush mount settings
- Color temperature shifting is available on Premier Model
- Premier Model available in black, white, polished aluminium, satin nickel and oil-rubbed bronze (Select Model available in black or white only)
- Occupancy sensor effortlessly saves energy by operating lights only when users are present
- SenseME™ Technology allows lights to be grouped and controlled through the Haiku app and lets you set timers for maximum convenience

Designer Series Light
